KISHAN SAHU

Java Backend Developer | Software Engineer
Spring Boot | REST APIs | SQL
India | +91-6393678598 | guptakishan492@gmail.com

PROFESSIONAL SUMMARY

Backend-focused software engineer who builds and deploys REST APIs and full-stack applications with Java, Spring Boot, Hibernate/JPA, SQL and Node.js. Experience across the SDLC in Agile teams, from requirements and design to testing, deployment and production support.

TECHNICAL SKILLS

Languages: Java (Core Java, OOP, Collections, Multithreading), SQL, JavaScript, TypeScript, Python
Backend: Spring Boot, Hibernate/JPA, RESTful APIs, JDBC, Node.js, JWT Authentication, Exception Handling
Frontend: React.js, Next.js, React Native
Databases: MySQL, PostgreSQL, MongoDB
Tools & Cloud: Git, GitHub, Postman, Docker, AWS (Cloud Practitioner certified), Render, Vercel
Concepts: Data Structures & Algorithms, DBMS, SDLC, Agile/Scrum, Unit Testing, Debugging, CI Workflows

PROFESSIONAL EXPERIENCE

Software Developer Intern (Full Stack) Aug 2022 – Dec 2023
Veer Bahadur Singh Purvanchal University, Jaunpur

- Designed, built, tested and deployed web applications end to end using Java and JavaScript, following SDLC and OOP principles.
- Engineered RESTful APIs with Node.js and MongoDB to power application data operations.
- Delivered features in Agile/Scrum sprints; wrote unit tests, debugged issues and optimized code.
- Used Git and GitHub for version control and CI workflows; deployed applications on Render and Vercel.
- Translated client requirements into features and resolved production issues as part of application support.

PROJECTS

SmartBuddy – AI Code Analysis Application Dec 2025
Spring Boot, Hibernate/JPA, MySQL, REST APIs, Next.js

- Architected Spring Boot REST APIs with a MySQL persistence layer using Hibernate/JPA for full CRUD operations.
- Implemented a rule-based analysis engine that detects code quality issues and drives automated refactoring suggestions.
- Integrated a Next.js frontend with the Spring Boot backend using a modular, layered architecture.

WealthOS / Finora – Personal Finance SaaS Platform 2026 – Present
Next.js, TypeScript, PostgreSQL, Supabase, React Native, Groq AI

- Building a finance platform with expense tracking, budgeting and financial goal management.
- Implemented authentication and PostgreSQL-backed data management using Supabase.
- Integrated Groq AI APIs to generate AI-powered financial insights.

VShop – E-Commerce Web Application (MERN) Jun 2023
MongoDB, Express.js, React.js, Node.js, JWT

- Developed authentication, product and order modules; tested with 50+ users.
- Implemented JWT-based authentication and optimized REST APIs, improving response time by ~25%.

Money Planner – Expense Tracking Mobile App Jan 2024
React Native, Real-time Database

- Built a cross-platform expense tracker with CRUD operations, reusable components and performance optimization.

EDUCATION

Bachelor of Computer Applications (BCA) – Veer Bahadur Singh Purvanchal University 2021 – 2023 | CGPA: 8.1/10

CERTIFICATIONS

Google Generative AI Essentials | Oracle Java Programming | AWS Cloud Practitioner
